Preface

During our days at Raymond High School, we have had many experiences. As we embarked upon this, our last year of high school, we took the opportunity to look back at the sorrows and thrills of our high school days.

Do you remember the day we won the State Soccer Championship? What about the day you got the highest mark in your math exam? Can you recall the first day behind the wheel of the Driver Education car? Those class plays, opening night, suddenly . . . forgot his lines! The exciting night we almost won the important basketball game. And oh, those sour notes in band and chorus. The strange odors from the science lab only to be topped by those from Home Ec.

These memories involve happy memories, and also some of the heartbreaks. In this, the 1968 Pynecone, we hope to show our most treasured memories to you.

Dedication

We, the Senior Class of 1968, would like to dedicate this year's PYNECONE to

MR. LEE MASON

As a coach, Mr. Mason has led our soccer team to two S. E. L. Championships and a State Championship in 1965 following an undefeated season. Mr. Mason's school spirit is infinite. He does not stop at soccer, but continues to show his exuberant vitality as a scorekeeper and spirit booster in basketball as well.

Our thanks go out to this outstanding teacher and coach for giving our class, and the entire school, spirit and an example to follow.

In Class,

Just Spectating,

C. MAURICE GRAY

Tremendous strides have been made in the past ten years in technical, mechanical, industrial, and scientific areas. Progress is so fast that placing men on the moon may be superfluous because machines may be able to accomplish as much or more. Education has made many successful adjustments in this era and needs to make no apologies. In the years ahead we may predict that educational progress and responsibilities will not be found wanting.

While this has been taking place a tremendous void has appeared in the whole complex area of human relations. One wonders if perhaps steps backward have not been taken rather than positive accomplishments achieved. We are at the stage where everyone seems to know something about human psychology which is also the point where "a little knowledge is a dangerous thing." Our biggest problems today, and for the indefinite future, are in that vast area of human communications and human relationships. These must be solved if we are to survive and if we wish to enjoy the products of technical skills. Salaries paid in these fields will not be commensurate with those in space or computer vocations. Other compensations of working in this vital area plus the knowledge that one is helping to save the human race must attract young people of great ability. May you as graduates of the Class of 1968 accept the challenge!

MR. JOHN J. CALLAGHAN

All around us we see horrendous examples of man's inhumanity to man. While at the same time, we have evidences everywhere of the tremendous advances in science and technology, especially during this century. Would that in the century to come we could advance on a par in the social sciences—the humanities. This, no doubt, would mean changes in the institutions established for the general welfare.

Since institutions can both help and hinder us in attaining our purposes in life, change is inevitable. For as Jefferson has said, "to expect institutions to remain unchanged is like asking a man to wear the same suit he wore as a boy."

If man is to endure it would seem that it is high time for him to exemplify man's humanity to man. One way for him to do this is to seek the desired changes through the democratic process. And it is our job—yours and mine—to make the democratic process work.

AN OPEN LETTER TO OUR GUIDANCE COUNSELOR:

MR. HUGHIN HOLT

Dear Mr. Holt,

Many times we have walked into your office. Perhaps we began talking about the weather or maybe the great game last night. Finally, without our realizing it, we are discussing our deepest problems with you.

In the clutter of your room, we find peace and an opportunity to "air our gripes" and say what we have to say. You help us with our problems and listen to all we say. When we leave your office we feel better and we know

SOMEONE UNDERSTANDS AND CARES

Thank you, Mr. Holt.

Sincerely,

The Senior Class of 1968

After serving in the United States Navy, Mr. Holt entered the University of New Hampshire where he received a Bachelor of Arts Degree. He did graduate work at Boston University and the New York University receiving his Master's Degree in Secondary School Guidance. Mr. Holt has taught many subjects, has coached the softball team and girls' basketball team and advised the Student Council.

For the last two years at Raymond High School, Mr. Holt has been kept occupied with guiding the students of Raymond and helping them decide what their future will be and how to best use the present.

Recognition

Mrs. Ruth T. Houghton

Mrs. Houghton has been a teacher at Raymond for thirty-five years. In this, her last year of teaching, we feel that she should be recognized in our 1968 Pynecone for the fine work she has done.

Mrs. Houghton has found it a pleasure teaching the first grade students of Raymond. In June of 1967, she was given the honor of being named the Teacher of the Month of the state of New Hampshire. In addition to being honored by the state of New Hampshire, the new wing of our high school was named in her honor.

Mrs. Houghton was trained to teach primary children and this training has been valuable to herself and her students.

We would like to thank her for teaching us and for being such a wonderful person.

Mr. C. Maurice Gray

We the class of "68" would like to take this opportunity to honor and thank our much admired superintendent, Mr. Gray.

In these past years we have seen both our school plant and its student population grow. Under Mr. Gray's supervision, Raymond Consolidated Schools have developed into the strong educational establishments that they are today.

Upon his retirement this year, Mr. Gray leaves behind him the many accomplishments he has brought to our school. For these we are extremely grateful.
